

Seite 1	von 2	<b>Health &amp; Safety Policy</b>	 <b>Bauer Safety Engineering</b>
	Akt. Stand 28.02.18		

This policy shows the commitment of Bauer Safety Engineering GmbH's management and workers to health and safety. The Company aims to remove or reduce the risks to the health, safety and welfare of all workers, contractors and visitors, and anyone else who may be affected by our business operations. In addition to that with this health and safety policy the Company wishes to make sure all work activities are done safely.

**The Company's management will provide and maintain as far as possible:**

- a safe working environment
- safe systems of work
- plant and substances in safe condition
- facilities for the welfare of workers
- information, instruction, training and supervision that is reasonably necessary to ensure that each worker is safe from injury and risks to health
- a commitment to consult and co-operate with workers in all matters relating to health and safety in the workplace
- a commitment to continually improve our performance through effective safety management.

**The Employees are obliged to:**

- comply with safe work practices, with the intent of avoiding injury to themselves and others and damage to plant and equipment
- take reasonable care of the health and safety of themselves and others
- wear personal protective equipment and clothing where necessary
- comply with any direction given by management for health and safety
- not misuse or interfere with anything provided for health and safety
- report all accidents and incidents on the job immediately, no matter how trivial
- report all known or observed hazards to their supervisor or manager.

## Implementation of Policy

**Information:** The responsible contact person in the Company will ensure that all employees have access to the Health and Safety Policy.

All employees should know where the first-aid kit, fire extinguishers and the emergency plan are located. They should also be familiar with the evacuation procedures.

**Risk assessment:** it will be undertaken for all members of staff. It consists in identifying the hazards; identifying who might be harmed and how; evaluating the risks from identified hazards.

If there are no hazards, there are no risks. Where risks are already controlled in some way, the effectiveness of those controls needs to be considered when assessing the extent of the risk that remains.

The results of the risk assessments will be recorded in writing, and safety procedures adjusted to ensure adequate levels of health safety and welfare.

Hermann Bauer
